Masonry

The Masonry Program prepares students for entry-level jobs in the architecture and construction industry. The program provides students with hands-on training associated with masonry and brick laying. Students in this program earn their OSHA-10 and forklift operator certifications.

Program Outcomes

By the completion of this program, students will be expected to demonstrate an introductory level of competency in the following skills:

- Read blueprints and plans.
- Construct block and brick walls.
- Mix and use various mortars using different methods.
